This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

Harvard College Library

FROM THE

BRIGHT LEGACY.

Descendants of Henry Bright, jr., who died at Watertown, Mass., in 1686, are entitled to hold scholarships in Harvard College, established in 1880 under the will of

JONATHAN BROWN BRIGHT

of Waltham, Mass., with one half the income of this Legacy. Such descendants failing, other persons are eligible to the scholarships. The will requires that this announcement shall be made in every book added to the Library under its provisions.

PREFACE.

With the issue of the Index, the valuable matter scattered throughout the *Transactions* of this Society becomes available for study.

The present General Index to the first twenty volumes, from 1876 to 1897, has been compiled in accordance with the rules approved of by the Congress of Archæological Societies in union with the Society of Antiquaries, held in London in December, 1897.

It is arranged in one alphabet under names of persons, places, and subjects. Contributors of Papers are distinguished by their names being printed in small capitals under each entry.

On account of the varied character and unequal quality of the Indexes issued with the volumes, they have not been used in the present work; the compiler alone is responsible for this compilation.

Amongst the new features which have been introduced, it is hoped that the one of grouping under subjects the matter relating to places will be found useful.

When the work was commenced, now nearly three years ago, the compiler did not realize its magnitude: as it proceeded, new ideas suggested themselves, and the plan of arrangement had to be altered from time to time to meet special cases.

Great care has been exercised, and much research made, in order to insure accuracy and to make the Index as useful and reliable as possible, but in a work of this kind it has proved impossible to prevent errors from creeping in. The compiler trusts that these will be treated with leniency, and that the work as a whole will be appreciated by the student of Gloucestershire Archæology.
